

MATERIALS EVALUATION AND ENGINEERING, INC.

Like all of you, MEE has been continuously monitoring the news and recommendations for protecting the health and safety of our staff, visitors, families and community. We remain open with all engineering and laboratory services fully available. We have developed site specific cleaning and safety measures following guidelines from the CDC and MN Department of Health, as well as professional laboratory associations.

Please note: All staff and visitors are required to wear masks and practice physical distancing when in the building.

We are prepared to provide collaborative work using remote conferencing to include light microscopy and SEM examinations. We also have protocols in place for safe group inspections in our large, high-tech inspection facility. We are confident that with the safety protocols and procedures we have in place we can continue to safely provide the high quality services you are accustomed to from the staff at MEE.
